

New Dialysis Unit for Out Patients

Parsee General Hospital has an existing Dialysis Machine in ICU, which till now was only used for treating in-patients with kidney failure.

On 10th Feb 2022, a new Dialysis unit was inaugurated at Parsee General Hospital by the Donor Mr. Neville Sarkari, in the memory of His Late Mother Mrs. Homai.

The new unit with two Dialysis Machines (& all the associated paraphernalia, like an RO Filter plant etc), will be a great boon for the Chronic Kidney failure patients of the community, especially the poor, who can take their repeated Dialysis on an OPD basis now.
